Floor Puller Lock Box

Floor-lifter tools often end up disappearing in a busy work environment. Even though they aren't exactly compact in size, they seem to travel more than you would expect. When an emergency occurs, you don't have the luxury of wondering who has the floor-lifter tool. You must have one available and fast. That's why

we devised the Floor Lift-A-Lock Box, a simple and convenient location for your floor lifter tools that any worker will be able to notice.

The Lift-A Lock Box can be mounted on a wall and ready for use in case of an emergency. When a crisis arises, you can pull the replaceable breakaway handle to access the floor-lifter tool. If you need a floor-lifter tool for daily use, the lock box can be unlocked and just used as an easy to get to storage device. The bright red color of the Lift-A-Lock Box makes it very easy to notice, almost like a fire extinguisher would be. The mounting hardware is accompanied with the kit, so all you have to do is hang it and remember when an occasion arises.

The Floor Lift-A-Bracket is designed to call attention to itself. Your staff will know where your floor-lifter tool is because they've seen it hanging on the brightly striped Floor Lift-A-Bracket. The red in the design mimics that of a fire extinguisher or stop sign, so it is guaranteed to catch the eye of one of your workers. When they need a floor-lifter tool, they'll know where to look.

You can purchase a Floor Lift-A-Bracket with or without the floor-lifter tool, depending on your needs. The package deal does provide some savings on the product when compared to buying them individually. You can also purchase it with a carpet puller as well, in case you have carpeted raised floors.

Floorpullers.com has been distributing floor pullers since 1979. Since our inception our goal has always been to satisfy our clientel by delivering quality products. Floorpullers.com is currently the largest distributor of floor accessing tools in the United States. Our ability to sell such durable products at so low of a price has set us aside from our competition. The next time you need to get under the floor, think floorpullers.com.

While flat surfaces are easy to manage because they can be attached to a suction cup. FirstTech Perforated Tile Puller is a must for computer rooms with perforated floor tiles because, it was designed to tackle those specific needs. Standard floor pullers are unable to lift perforated floor tiles because of the inability to trap air for suction. This tool allows for tile extraction by simply hooking and pulling.

A floor puller is a must have in any data room with a raised access floor. Any time you need to access your sub floor, our floor pullers have you covered. The suction cups on the puller have an incredible strength that is well complemented by the strong metal handle. The five inch suction cup is durable, making it able to grip a variety of surfaces and hold onto it tightly. There is an easy release access on the handle so you can remove the floor puller once you've completed a task. Everything from the materials to the design is well thought out and executed, giving you the best product possible.

Single Cup Floor Lifter
